GYUYEON LIM

education

2023–2027 B.S. in Computer Engineering, Gachon University, Seongnam-si (expected).

- GPA: 4.41 / 4.5 (Ranked 7th out of 426, top 1.6%; 121 of 120 credits)
- Research guidance from Prof. Myung-Kyu Yi, Institute of Biomedical Engineering, Hanyang University (since 2024.06)
- Graduation thesis advised by Prof. Yourim Yoon, Gachon University

2020–2023 Mathematics & Science Intensive Program, Hyosung High School, Seongnam-si.

research interests

Machine Learning. Learning compact, structured embeddings from high-dimensional data. Focuses on contrastive and self-supervised methods, data embedding, and latent space geometry.

Temporal or Spatiotemporal Modeling. Temporal and spatio-temporal modeling for forecasting and classification of multivariate sensor streams. Covers sequence models, graph-based dependencies, and large-scale time-series architectures.

AI for Science. Applying deep learning to physical and biological signals — IMU, EEG, and multivariate sensor data. Integrates physics priors, domain constraints, and signal structure into model design.

publications (conference submissions)

Preprinted Junha Kim*, Gyuyeon Lim*, and Jay-Yoon Lee. "STREAM: Dynamic Channel Graphs with Autoregressive State Propagation for Multivariate Forecasting." *submitted*.

Preprinted Taeyang Lee*, Gyuyeon Lim, Sebin Lee, Kevin Valencia, Jay-Yoon Lee, Xihaier Luo, Shinjae Yoo, Jiook Cha, and David Keetae Park. "NeuroX-EEG: Scalp Field Inpainting for Zero-Shot EEG Super-Resolution." (2nd author) *submitted*.

Preprinted Yidu Song*, Gyuyeon Lim*, and Ahyoung Choi. "ENURI: Evidence Negotiation Using Reasoning over Images." *submitted*.

publications (journal articles)

2026.09 Gyuyeon Lim* and Yourim Yoon. "Global-Local Dual Prototype Network for Interpretable Time Series Classification." *Asia-Pacific Journal of Convergent Research Interchange*, Vol. 12, No. 9, pp. 293–305 (2026). DOI.

2026.07 Gyuyeon Lim* and Myung-Kyu Yi. "LPSN: A Learnable Parametric Spectral Network for Wearable Human Activity Recognition." *IEEE Sensors Journal*, Early Access (IF 4.5). DOI.

2026.04 Gyuyeon Lim* and Myung-Kyu Yi. "Rotation-Robust Self-Supervised Learning for IMU-Based HAR with Multi-Scale Convolutional Backbones." *IEEE Transactions on Consumer Electronics* (IF 10.9). DOI • Code (InceptionMK).

2026.03 JunYoung Park*, Gyuyeon Lim, and Myung-Kyu Yi. "Dynamics-Aware Action State Flow for Wearable Human Activity Recognition." *IEEE Sensors Journal* (IF 4.5). (2nd author) DOI.

2026.03 Gyuyeon Lim* and Myung-Kyu Yi. "Robust Sensor-Based Activity Recognition via Physics-Aware Disentangled Representation Learning and Feature-wise Linear Modulation Conditioning." *IEEE Sensors Journal* (IF 4.5). DOI • Code (PADR).

2026.02 Gyuyeon Lim* and Myung-Kyu Yi. "CAP-SSM: Context-Aware Prototypes and Selective State-Space Modeling for Efficient Wearable Human Activity Recognition." *IEEE Sensors Journal* (IF 4.5). DOI • Code (CAP-SSM).

2026.01 Gyuyeon Lim* and Myung-Kyu Yi. "Prototype-Guided Physics-Modulated Perceiver for Human Activity Recognition." *IEEE Internet of Things Journal* (IF 8.9). DOI • Code (P2-Perceiver).

2025.09 Gyuyeon Lim* and Myung-Kyu Yi. "Contrastive Learning for Zero-Shot Human Activity Recognition Using Labeled Simple Actions on Wearable Devices." *IEEE Sensors Journal* (IF 4.5). DOI • Code (ZSL-HAR).

research experience

2025.12–Present Research Intern, Seoul National University Graduate School of Data Science, SKI-ML (Prof. Jay-Yoon Lee), Seoul.

- Structure and Knowledge Injection into Machine Learning (SKI-ML lab)
- Spatio-temporal multivariate modeling for large-scale time-series with graph dependencies (STREAM)
- Co-authored NeuroX-EEG, in collaboration with the Connectome Lab (Prof. Jiook Cha)

2025.02–2025.06 Undergraduate Research Intern, Seoul National University Hospital, BMI Lab (Prof. Kwangsoo Kim), Yeongeon, Seoul.

- Biomedical Informatics Lab (SNUH BMI LAB)
- Holter Foundation Model and MLOps Development Team

teaching experience

2025.09–Present Math-based University Essay Instructor, Nonsoolmate, Seoul (Remote).

- Grading and coaching students on math-based university admissions essays

2026.01–2026.08 High School Math Instructor, Myungmun Seoil Academy Premium, Seongnam-si.

- CSAT (Suneung) and school exam preparation, STEM track focus

2023.06–2026.06 Lead Math Instructor, Metrix Mathematics Institute (HB Math&Eng), Seongnam-si.

- Primary instructor for middle and high school students (grades 2–3) and CSAT retakers
- Specializing in CSAT preparation for STEM track students

scholarships

2025.12 SCI Publication Scholarship, Gachon University — the Highest Honor.

Every semester Academic Excellence Scholarship, Gachon University.

From 3rd year National Science & Technology Scholarship, Ministry of Science and ICT (MSIT).

2024.01 Science & Engineering Excellence Scholarship, Anyang-Gwacheon Chamber of Commerce and Industry.

honors & awards

2026.08 SNU AI Challenge 2026 — Final Rank 21st / 129 Teams (Team Gyuyeon Lim, solo participant). "Temporal Event Matching via Permutation-scored Ordering Hard-Negative Listwise Ranking for Chronological Frame Reconstruction with Vision-Language Models." Report.

2026.08 Research Division 2nd Place, 1st Gachon University Computer Engineering–Artificial Intelligence Academic Festival, Gachon University. ENURI.

2026.01 P-Career Catch 2 — Outstanding Completion, Career Exploration Credit Program, Gachon University. GitHub.

2025.05 Severance Challenge Award, 2025 Yonsei Yongin Severance Hospital Healthcare Hackathon.

2025.06 3rd Place, AI/SW Day Oral Presentation, Gachon University — YOLOv5 Children Protection Area detection. GitHub.

2024.10 ICPC Seoul Regional Finalist, Team GPT — 168th of 376 teams, KINTEX, Goyang-si. Official.

2024.01 Grand Prize, Future Design Project, Gachon University (1st place).

2023.06 Grand Prize, Software Competition, Gachon University (1st place) — Smart Home with Physical Computing.

2018.11 Minister of Oceans and Fisheries Award, 2018 National Student Science and Invention Competition.
